

Partner in Parts

Multi-Fix was established about 20 years ago as a trading company in stainless steel fasteners. During the past twenty years, Multi-Fix has further developed its services and became a full-service supplier and manufacturer of standard fasteners and custom metal components.

Multi-Fix Europe is located in Bergeijk. Approximately 40 employees are responsible for supplying goods to our customers in the majority of European countries. Multi-Fix is characterized by efficient management, supported by advanced automation and logistics.

In 2008, the premises of Multi-Fix were completely renovated, including a reorganization of the central warehouse.

Multi-Fix Asia performs its activities mainly from Shanghai. We have an extensive organization and our own production facility in the Nanhui Industrial District. The organization has a production department with about 150

employees, working in a production facility for machining operations measuring 7000 m².

During the past 20 years, Multi-Fix has developed itself from being a local trading company to both an international player in supplying metal parts and a leader in the Chinese market for wind turbine components. Multi-Fix Group delivers its products in 17 countries on 4 continents.

Multi-Fix is your partner for almost any conceivable metal component in your product. Our supply programme and service package are unique. Multi-Fix ensures: reduction of overall cost in your supply chain, simplification of your order and delivery process, order completion and supply process, reduction in the number of articles you need to order, deeply ingrained quality assurance and technical support per request.

“Multi-Fix is your partner for almost any conceivable metal component in your product”

“Multi-Fix supplies virtually any product, right to the processing point if you want”

Our product range contains standard items, including metal parts as per your specifications and assembled or welded products.

Multi-Fix group can provide production, assembly, packaging and logistics of serial composite metal products. Also working with other materials such as plastics is possible. We coordinate efficient, manageable, transparent and reliable outsourcing through our own production facilities or our network of suppliers in low wage countries.

Customized products

The items we take into production are often unique and custom made. With thorough preparation and careful and constant monitoring, Multi-Fix can assure you that the outsourced work is being performed exactly according to your design and specifications.

Production processes

Our international partners are among others specialized in turning, stamping, milling, welding, casting, aluminum extrusion, plastic parts and assembly.

Full service

Multi-Fix guarantees an efficient supply of quality articles. Due to our years of experience and market knowledge, we can also seamlessly integrate our products into your business operations. Using well-considered logistic services, we ensure an impeccable supply, simplifying your purchasing and stock administration.
