

Automation

Multi-Fix BV Group has expanded its service with an electronic business program. The electronic business program offers the most efficient way to get order (s) and / or information from A to B with as few actions as possible.

What possibilities of Electronic Business offers Multi-Fix?

EDI (Electronic Data Interchange)

EDI is a standard for electronic exchange of certain business documents such as orders, invoices, messages or attachments. It is part of Electronic Business. Because those documents must meet certain standard templates, it is mainly used for repeating transactions.

EDI at Multi-Fix

- Import orders through our webshop
- Using mail (via standard field / format) which can directly be imported into our system

Logistic bin system

Also, the many advantages of a logistic bin system may be used in combination with the Electronic Business. Example, you can import orders through barcodes or scanner.

Webshop

Besides importing of your order through EDI or scanner you can place your orders online 24/7. Through the webshop you have access to current inventory data, prices, other product details and order history. In addition, the shop is provided with convenient search features. For example, all products in our webshop include the corresponding product image.

“The electronic business program offers the most efficient way to get order(s) and / or information from A to B with as few actions as possible”

“Multi-Fix Group adjusts the electronic business program to your specific needs.”

Also functions as quick order and repeat orders are available in our webshop. The quick order feature provides you the opportunity, in addition to our product numbers, to search through your own product numbers. After placing your order you will automatically receive an order confirmation by e-mail.

What are the benefits of electronic business for you as a customer?

- **Less handling**
Electronic business ensures minimal action of placing your order. An export file from your system can directly be imported into our ERP system.
- **Reduced chance of errors**
No more manual operations in the ERP system but an automatic import reduces the error probability of the orders.
- **Minimum communication**
Electronic business enables you to place your orders in your own time and therefore minimal communication with our office. You are no longer dependent on our opening hours.

Together we look which suitable form of electronic business is best for you. We adjust this program to your specific needs. Multi-Fix, your partner in parts!

“Less handling, reduced chance of errors and minimum communication are some advantages of electronic business”
